Insight. Strategy. Delivery.

A DEEPER OPERATIONAL REVIEW

DISCOVERY / SPECIALIST ASSESSMENT

A structured assessment for operational issues or opportunities that need evidence, observation and a clear written recommendation before investment, redesign or change.

DISCOVERY / SPECIALIST ASSESSMENT

Typical engagement: 2 on-site days

Written report within 3 working days

FROM £1,125

1-hour video review included

In-person review: £75

A GOOD FIT WHEN

- The underlying cause of an operational problem is not yet clear and decisions need stronger evidence.
- You need independent observation of a warehouse, depot, fulfilment, stock, fleet or asset process.
- A layout, consolidation, capacity or workflow change needs structured assessment before investment.
- KPIs, defects, repair performance, availability or service issues need to be traced back to operational causes.
- You want practical recommendations, priorities and risks documented clearly before deciding what happens next.

Move from assumption to evidence - then decide what is worth changing.

Independent operational assessment with practical, proportionate recommendations.

DISCOVERY / SPECIALIST ASSESSMENT

ASERA CONSULTANCY

TYPICAL ASSESSMENT AREAS

- Operational efficiency, process flow and root-cause investigation
- Warehouse, fulfilment and depot layout, capacity and service performance
- Stock accuracy, fleet utilisation, asset availability and repair flow
- KPI design, performance loss and revenue-protection opportunities
- Lean, 5S, visual management and standard-work opportunities
- Consolidation, relocation and future-capacity decisions
- Operational technology, automation and workflow feasibility

HOW IT WORKS

01 **Define the question**

Agree the operational issue, decision or opportunity to be assessed and the evidence needed.

02 **Observe and analyse**

Review the operation on site, challenge assumptions, examine available information and identify causes, constraints and options.

03 **Report and review**

Receive a concise written assessment with findings, priorities and recommendations, followed by a structured review session.

WHAT YOU RECEIVE

- Two on-site assessment days within the typical starting scope.
- A written report issued within 3 working days of the assessment.
- Clear findings, priorities, risks, dependencies and practical recommendations.
- A 1-hour video review to work through the findings and next-step options.
- Optional in-person review for £75.

WHAT THE ASSESSMENT IS - AND IS NOT

It is an independent advisory assessment of an agreed operational scope. It is designed to provide evidence and recommendations - not to assume management control or make client decisions.

Unless expressly included in writing, it is not a statutory compliance audit, certification, engineering sign-off, project-management appointment, principal-contractor role or dutyholder appointment. Any implementation support is scoped separately.
