ASERA
CONSULTANCY
Insight. Strategy. Delivery.

A PRACTICAL FIRST STEP

INITIAL FIT CHECK

A focused first conversation to understand the operational challenge, test whether Asera is the right fit, and identify the most sensible next step before you commit to a larger engagement.

1-HOUR TEAMS FIT CHECK	**FREE**
In-person Fit Check	**£75**

A GOOD STARTING POINT WHEN

- You know something is underperforming, but the real cause is not yet clear.
- A warehouse, depot, fulfilment or operational process is under pressure.
- Stock, fleet or asset visibility is creating cost, delay or availability problems.
- KPIs are being measured, but they are not driving the right operational behaviour.
- You are considering a layout, capacity, consolidation or process change and want an independent view before committing resource.

Understand the issue first. Commit to the right level of support second.

Independent operational advice focused on practical, proportionate next steps.

INITIAL FIT CHECK

ASERA CONSULTANCY

TYPICAL AREAS WE SUPPORT

- Operational efficiency, process design and continuous improvement
- Warehouse, fulfilment and depot operations
- Stock control, fleet and asset management
- KPI, performance and revenue-protection frameworks
- Lean, 5S and practical operational excellence
- Workplace layout, capacity, consolidation and relocation planning
- Operational technology and process opportunities where they can simplify work or improve control

HOW IT WORKS

01 **Set the context**

Tell us the issue, opportunity or decision you are trying to work through.

02 **Focused conversation**

We use the session to challenge assumptions, clarify the operational picture and identify what matters most.

03 **Clear next step**

You receive a practical steer on whether the issue needs no further work, a deeper assessment, or a focused improvement engagement.

WHAT YOU LEAVE WITH

- An independent view of the operational issue or opportunity.
- Initial observations on likely priorities, risks and dependencies.
- A clear recommendation on the proportionate next step.
- A better basis for deciding whether further consultancy investment is justified.

WHAT THE FIT CHECK IS - AND IS NOT

It is an initial scoping conversation - not a detailed audit, formal compliance assessment, project-management appointment or written diagnostic report.

Where deeper analysis is justified, Asera may recommend a Discovery / Specialist Assessment, Improvement Sprint or Fractional Retainer. Asera remains an independent adviser unless another role is expressly agreed in writing.
