Coquitlam, BC

We Serve the Lower
Mainland

Window Screen Measuring Cheat Sheet

1. Measuring Your Screen:

- Measure from the **exterior** of the window frame.
- Measure **Width × Height**, in **inches to the nearest 1/8"**.
- Measure the opening, **not including the screen frame**.

2. Frame Thickness (Use Quarters to Estimate):

- **7/16" Frame** = ~7 quarters (common for sliding windows)
- **5/16" Frame** = ~5 quarters (narrower sliding windows)

3. Screen Frame Bar Types:

- **7/16"** – Standard sliding window
- **5/16"** – Slim sliding window
- **Lip Bar** – Awning windows (handles on frame)
- **Wicket Bar** – Awning/casement (handles on sash)

4. Tips for Accuracy:

- Measure **twice**, label by **room**, and **note how the screen sits**.
- Record to **1/8" precision**.
- Take photos if uncertain about the frame or handle.

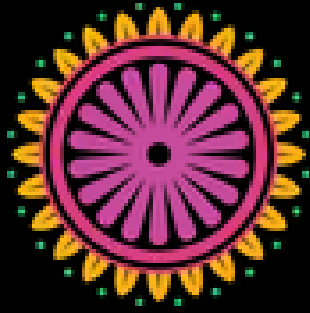

5. Submitting Measurements to hello@bloombug.ca:

- Once measured, please email us with the following:
 - W: in inches

- H: in inches
- Colour of frame
- Type of frame
- Email full photos of the frame & handle.

6. Price List Relevant May - Dec 2025. Prices subject to change. Terms & Conditions apply

Screen Type	Base Price	Add-on: Color(Brown/ Beige/ Black)	Add-on: Oversize (W > 44" or H > 44")	Additional Wickets

7. Measurement Guide for Wicket Bar Screens:

- Measure Width × Height of the full screen as usual.
- Identify if there is **1 or 2 wicket doors**.
- For each wicket door, measure from the **top of the screen to the center of the opening clip**:
 - If there is **1 wicket door**: measure **from the top to the clip of the wicket door**.
 - If there are **2 wicket doors**: measure **from the top to the clip of each wicket door**.
- Ensure all measurements are recorded to the **nearest 1/8 inch**.
- Include these center point measurements in your email along with width and height.
