

PrePark Cookie Policy

Version 1.0 | Last updated 14 September 2026

This policy explains how PrePark uses cookies and similar technologies. It must be kept consistent with the live cookie-consent tool and the cookies actually deployed on www.prepark.co.uk.

1. What are cookies?

Cookies are small files or similar storage technologies placed on a browser or device. They can be used to operate a website, remember choices, support security and payments, measure performance or provide analytics.

2. How PrePark uses cookies

Category	Purpose	Consent position
Strictly necessary	Authentication, account sessions, security, load balancing, booking flow and essential payment functions.	Used where necessary to provide the service; consent may not be required where the legal exemption applies.
Preferences	Remember non-essential user choices and interface preferences.	Consent where required.
Analytics	Understand how people use the Platform and improve performance.	Only enabled where required consent has been obtained.
Advertising / tracking	Measure campaigns or personalise advertising if PrePark introduces these technologies.	Must not be enabled before valid consent where consent is required.
Payment / fraud prevention	Stripe may use cookies or similar technologies during checkout or fraud-prevention processes.	Treatment depends on the technology and legal purpose; essential payment/security functions may be necessary.

3. Your choices

Where consent is required, PrePark should provide a consent mechanism that allows users to accept or reject non-essential categories and change their choice later. Rejecting non-essential cookies must not prevent access to core booking functionality.

Users can also control cookies through browser settings, although blocking strictly necessary cookies may prevent account, booking or payment features from working correctly.

4. Cookie register

The live cookie banner/manager should contain the current register of cookie names, providers, purposes and durations. The following table records the minimum expected categories and must be verified against the live service:

Provider / source	Expected use	Typical category	Action before launch
PrePark / Base44	Session, authentication, security and application operation.	Strictly necessary	Confirm exact cookie names and durations.
Stripe	Checkout, payment security, fraud prevention and Connect/payment functionality.	Strictly necessary / payment security depending on use	Confirm current Stripe cookie disclosures.
Analytics provider (if enabled)	Traffic and usage measurement.	Analytics	Insert provider and cookies; keep disabled until consent where required.
Advertising provider (if enabled)	Campaign attribution or personalised advertising.	Advertising	Insert provider and cookies; do not deploy before valid consent where required.

5. Changes to this policy

PrePark will review this policy when cookie use, suppliers or applicable requirements change and will seek fresh consent where required by law.

6. Contact

Questions about cookies or privacy can be sent to info@prepark.co.uk. Website: www.prepark.co.uk.
