2025 CUSTOM RECESSED STANDARD DECORATIVE FORMED METAL FIREPLACE SCREENS

Standard 1/4"-19 Ga. Satin Black firescreen mesh with 40% additional fullness and attractive positive control 4" wands finished to match faceplate. Full length galvanized back plate stiffener provides strength and insulates both top bar and bottom bar against heat damage. Back plate bracket slots allow 3/4" height adjustment. Heavy duty lintel clamps for easy mounting adapt to a steel lintel thickness up to 3/4" and lintel widths up to 4 1/4". Lintel clamps used with lintel brackets will allow up to a 6 1/2" depth adjustment from the fireplace face to the inside corner of the lintel. All brackets are zinc plated. Self-tapping screws are included for use with brackets where standard lintel clamps cannot be used. Stainless steel backrods for long-lasting smooth operation are standard. Also, protective mesh reinforcing rods keep the edges of the mesh panels from being damaged or warped. Several special options are available, including pull chain operation. All screens are packed in triangular cartons for maximum protection.

STANDARD FINISHES AVAILABLE:	Enduring Black	(01)
	Plated Polished Brass	(49)
	Tuscan Iron	(82)
	Classic Bronze	(88)

Serenity™ Shower Dividers

Cascade's Serenity shower dividers provide a sustainable yet elegant solution for today's shower spaces requiring low maintenance and a luxurious look and feel to match their environment. The rich luster of the woven coils adds a unique texture to any style of bath space. As the steam heats the coils, a wall of warmth is created to surround you and soothe your soul, blissfully melting away your worries until you realize you have found... Serenity.

Serenity shower dividers allow light to filter through, creating a more open feeling shower experience, but still capture water like any other fabric shower curtain. You can use a liner but depending on the type of shower you have, you may choose not to.

Besides being 100% recyclable, Serenity shower dividers are certified by the Living Building Challenge Declare labeling program. They are odorless and lightweight and will not fade, rust or stain. Serenity shower dividers are easy to install and can be used with standard shower dividers hardware.

Serenity shower dividers are woven out of 18-gauge aluminum in a 1/4" weave size and are offered in the standard 72" x 72" size to fit most showers. Custom weave sizes, dimensions and finishes including stainless steel are available. Please contact us to discuss your needs.
