Laser Protective Clothing

LMS-LASER-PROTECTIVE-CLOTHING

Protective garment made from composite carbon fibre for use in a planned laser-work protective system. Discuss the required body coverage and fit with us before ordering.

- Composite carbon-fibre material
- Coverage and fit selected for the task

Technical specifications

Wavelength range	200–11000 nm
Material	Composite carbon fibre
Standard size	One size
Referenced standards	EN 12254; IEC 60825-4
Net product weight	2.1 kg

Selection & use

Use as part of a planned protective system. Wavelength coverage alone does not specify a safe exposure power or duration. Fit, coverage, condition and the task-specific assessment determine suitability.

For your quotation: Include the required coverage, fit, quantity and laser process in your request. We specify the suitable size and supplied items in the offer.
