Full-length practice directions

June 2026 public booklet with one new constructed-response task.

Name _____ **Date** _____

1. Open or print the complete NYSED booklet and the answer materials for this administration. Use the original diagrams or organizers wherever a response requires them. Use the reference materials specified in the booklet.

Open the public exam booklet **Answer booklets and reference links**

2. Work through the public booklet in order. When you reach question 35, substitute the practice insert on the next page for that response. Do every other question as printed. Keep any shared original stimulus available for surrounding questions.

3. Use the time allowance and materials printed on the public booklet, with local accommodations as applicable. Show your response to the replacement on this insert or a labeled sheet. Use the state answer materials for the remaining questions.

If you have seen the public form before, tell your teacher which questions you recognize. This assembled form is for local practice.

Two freight bills

New material for the full-length practice assembly.

Name _____ **Date** _____

A carrier charged $89 to send 4 large cases and 3 small cases. A second bill from the same carrier lists 2 large cases and 5 small cases for $83. Each case size has a fixed price.

Define variables and model both bills. A customer proposes $17 per large case and $7 per small case. Test both bills, solve algebraically for the actual prices and verify them.
