

Experience a Double in Quality

Solarlux Awning
Made by WAREMA

Enjoy Maximum Comfort with the Solarlux Awning Made by WAREMA

Canopy meets awning

From now on you can enjoy the benefits of a double in quality 'Made in Germany': together with our new cooperation partner SunLight Manager WAREMA, Solarlux, the specialist for folding glass doors and customised canopies will leave nothing to be desired when it comes to your personal comfort space on the patio.

The specially-enhanced Solarlux glass canopy Atrium plus is the ideal partner for WAREMA's high-end awnings: innovative section and rail technology combined with special awning holders speed up assembly on site, countless variations of design and shading allow for maximum freedom of design.

> Product Benefits

Developed together, convincing all-round

No more irritating light gaps: the interaction of WAREMA's patented secudrive® technology and the specially designed awning holders on the rafters ensures maximal shade comfort under your canopy. Both the canopy and the awning form a perfect unit and provide perfect shading, completely without irritating light gaps.

The ideal awning fabric provides reliable shading even in windy conditions. To underline the filigrane and elegant design of the Solarlux awning made by WAREMA, it comes without the annoying fabric support rope. Easy-to-control canopy: you decide on the shading level required via an app or using a switch.

» No irritating light gaps

» App-controlled awnings

» Choice of canopy widths available up to six metres

> Design and Variety

The choice is yours

Elegant design meets unique fabric quality: The Solarlux awning made by WAREMA comes with a wealth of design and shading options for canopy sizes of up to 6 metres. Always a precision fit. Once combined with a variety of vertical

glass elements, your patio quickly turns into a glass house providing perfect weather protection. Our vertical glazing options provide a solution for all requirements and can be combined with all awnings, of course.

» External awning

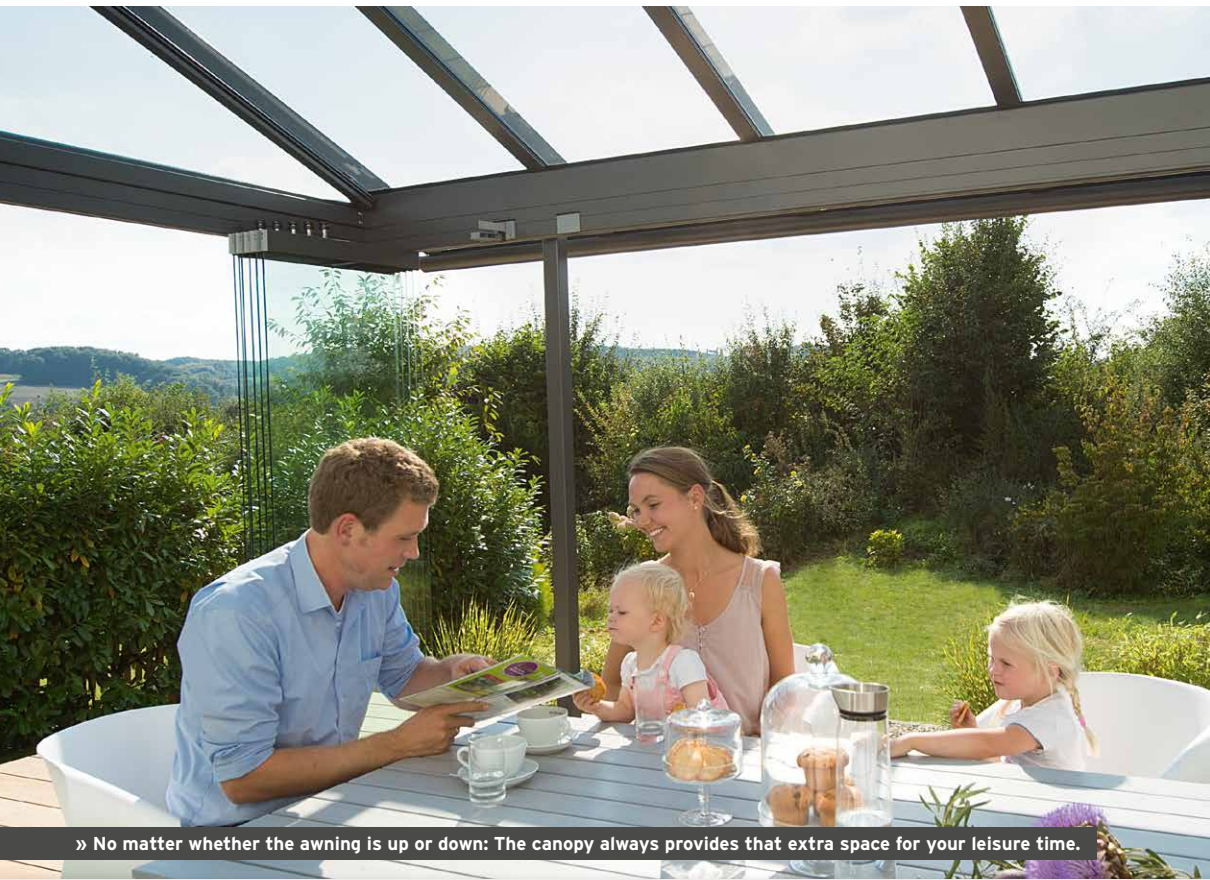

» Internal awning

» External awning

» Internal awning

» No matter whether the awning is up or down: The canopy always provides that extra space for your leisure time.

> Design and Variety

» **Valance roller blinds:** the ideal internal awning solution for that extra shading. Vertical shading provided through manually operated vertical valance blinds, protecting you from the rays when the sun is low. Of course, valance roller blinds can also be fitted to glass houses giving you perfect protection from the sun if required.

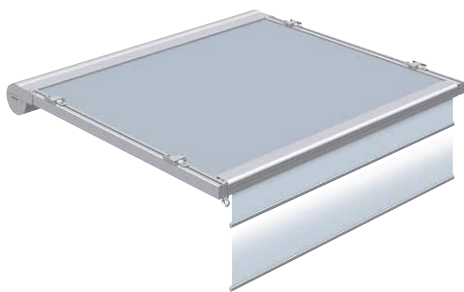

» Internal awning with valance roller blind

» **Corner solution:** you require an awning for a south-west or west facing patio? We have the perfect shading solution for the difficult corner area. A specially designed window awning with zip guide provides perfect vertical sun protection – even for corners.

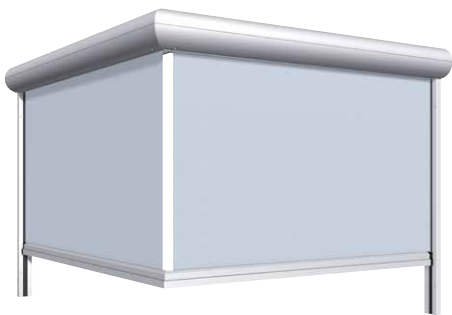

» Sun shading even for corners

» Valance roller blind

» Window awning for corners

Colours for all seasons

Countless colour options, high-end quality fabrics: tastes differ and so do our clients' ideas of their perfect awning. This is why our customised canopy SDL Atrium plus together with its matching

awning are available in a number of colour options. WAREMA's unique quality meets the highest quality demands, thus perfectly complementing the high-end Solarlux canopy in both comfort and design.

» A wealth of choice in colour and fabric

> Planning and Ordering

Bespoke solutions

What your ideal canopy should look like is sometimes not so easy to put into words. This is why Solarlux and all its trading partners provide both bespoke products and tailor-made advice. The bonus feature: using 3-D visualisation our

expert planners can show you what your canopy will look like on your house. All we need is a photo of the house. Our specially-developed visualisation software helps our consultant to develop the perfect solution for your home.

Comfort starts with the order

You can order directly from one source: from now on you can order both your dream canopy and a matching awning through the Solarlux trading partners on site. Along with the new awning, we

provide perfect service - to simplify both the ordering process and logistics. From now on the canopy and the awning are delivered at the same time.

» Perfect all-round service

» Logistics made easy

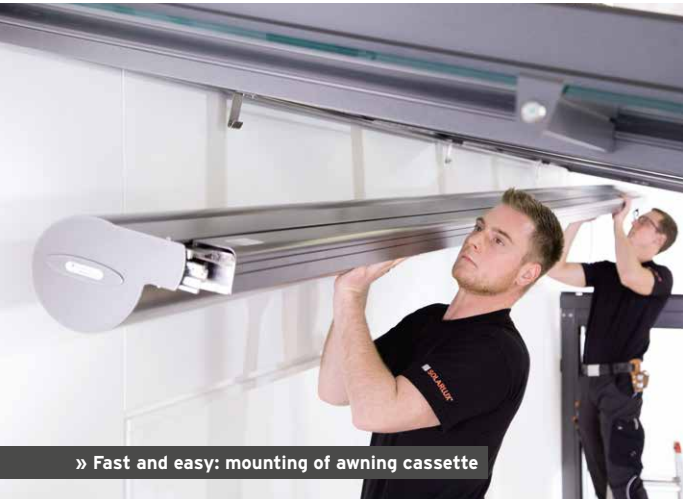

» All from one source: place your order on site

> Assembly and Service

Quick and easy assembly

The Solarlux made by WAREMA awning can be fitted in the morning and enjoyed in the evening: thanks to sophisticated and perfectly compatible technology assembly on site has become even faster and safer. Only two staff are needed to take

care of the smooth fitting of the awning completely without any mechanical treatment. This means that you can enjoy the maximum comfort on your patio with just a few hours of work.

» Fast and easy: mounting of awning cassette

» Only two fitters needed on site

» Fitted in the morning, enjoyed in the evening: Solarlux awning made by WAREMA

> Accessories

More comfort for your canopy

Service from one source only is key. This is why at Solarlux you get your canopy or glass house together with all the necessary and useful accessories. If you want some shading along with

remote control, LED lights or radiant heaters for your canopy or glass house: pick your choice and order directly from us, of course, both along with and after installation.

» **LED light bar:** enjoy warm evenings on your patio. Integrated LED lights create a cosy ambience after dusk and set your patio in pleasant lighting.

» **Solarlux canopy control:** the innovative Solarlux control opens and closes your awning as well as switching the built-in lighting on and off or just dimming it. As an added bonus, the receiver module is hidden inside the spotlight bar.

» **Bird protection glass:** glass comes with many benefits. However, for birds glass houses, winter gardens and canopies can pose a life-threatening hazard. In order to reduce the risk of collision, Solarlux can install bird protection glass on request which makes the panes visible to birds thanks to being low-reflective.

» **Ideal aeration:** Optional sliding roof panels fitted with a motor can be opened and closed according to your needs.

> Consulting

» Our dealers would be happy to offer you their advice either during a visit to your house or in their vast showroom, whatever suits you best.

» **Client and service oriented:** we find a solution for all your wishes and turn your ideas into reality. You can rely on us!

> Reasons for Solarlux

About Solarlux

For over 30 years Solarlux has been standing for excellent quality in the manufacture of folding glass doors, wintergardens and facade solutions. You can benefit from decades of experience in the development and manufacture of bespoke glazing solutions and build on quality "Made in Germany"!

Certified assembly

Specially trained fitters ensure an approved and timely installation. To meet our own high demands in quality, all fitters regularly participate in trainings and seminars at the Solarlux Academy to provide the best possible service.

High-end solutions

Solarlux and its partners support you with the planning of all your building plans right from the start. Trained expert planners, engineers and architects are happy to give you plenty of advice with the development of bespoke solutions. This goes for small building sites, such as private homes as well as major construction projects.

Certified quality

Not only does Solarlux provide you with smoothly operating systems, they deliver the necessary certificates along with them. All systems are continuously tested and further developed. Test certificates of renowned institutes prove our high demands in quality.
