

Approved camera make and model for Facial Recognition Matching

Embedded Open Platform

We utilise CCTV cameras with ***Embedded Open Platform, or EOP for short***. EOP enabled cameras allow third-party applications to be downloaded, installed and run on network cameras.

This is called either Dahua Hardware Open Platform (DHOP) or Hikvision Embedded Open Platform (HEOP).

Demographics

The Demographics function is currently only available on the Dahua camera range listed below.

HIKVISION

Any model camera in the HIKVISION 3 Series G5 range

DAHUA

Any model camera in the 5 Series S3 and 5 Series S2 ranges

AXIS

Any model camera which does object detection specifically the M4216.
