

DFW Mobile Auto Mechanic Pros

Mobile mechanic · Fort Worth, Texas · Full Package client

THE SITUATION

A mobile mechanic serving the Dallas Fort Worth Metroplex. Customers search for this service in the moment their car breaks, almost always with searches like "mobile mechanic near me," so the business only exists to them if it shows up right then. GMScalez rebuilt the site's search structure and runs the full engine: 25 service pages, 14 city pages, and 350 service-plus-city pages (399 total), Google Business Profile management, two posts a week from real job photos, and full call and text tracking.

RESULTS, 30 DAYS ENDING AUGUST 1, 2026

134

CLICKS FROM GOOGLE IN 30 DAYS

+262%

VS THE PREVIOUS 30 DAYS (37)

100%

OF CLICKS FROM PEOPLE WHO DID NOT SEARCH THE BUSINESS NAME

That last number is the one that matters. Every one of those 134 clicks was a potential customer who did not know the business existed. Nothing here is inflated by people who were already looking for the company.

WHAT PEOPLE SEARCHED TO FIND THEM

SEARCH	CLICKS
mobile mechanic near me	26
mobile mechanic	13
dfw mobile mechanic	11
mobile mechanic fort worth	7

BEYOND THE CLICK NUMBERS

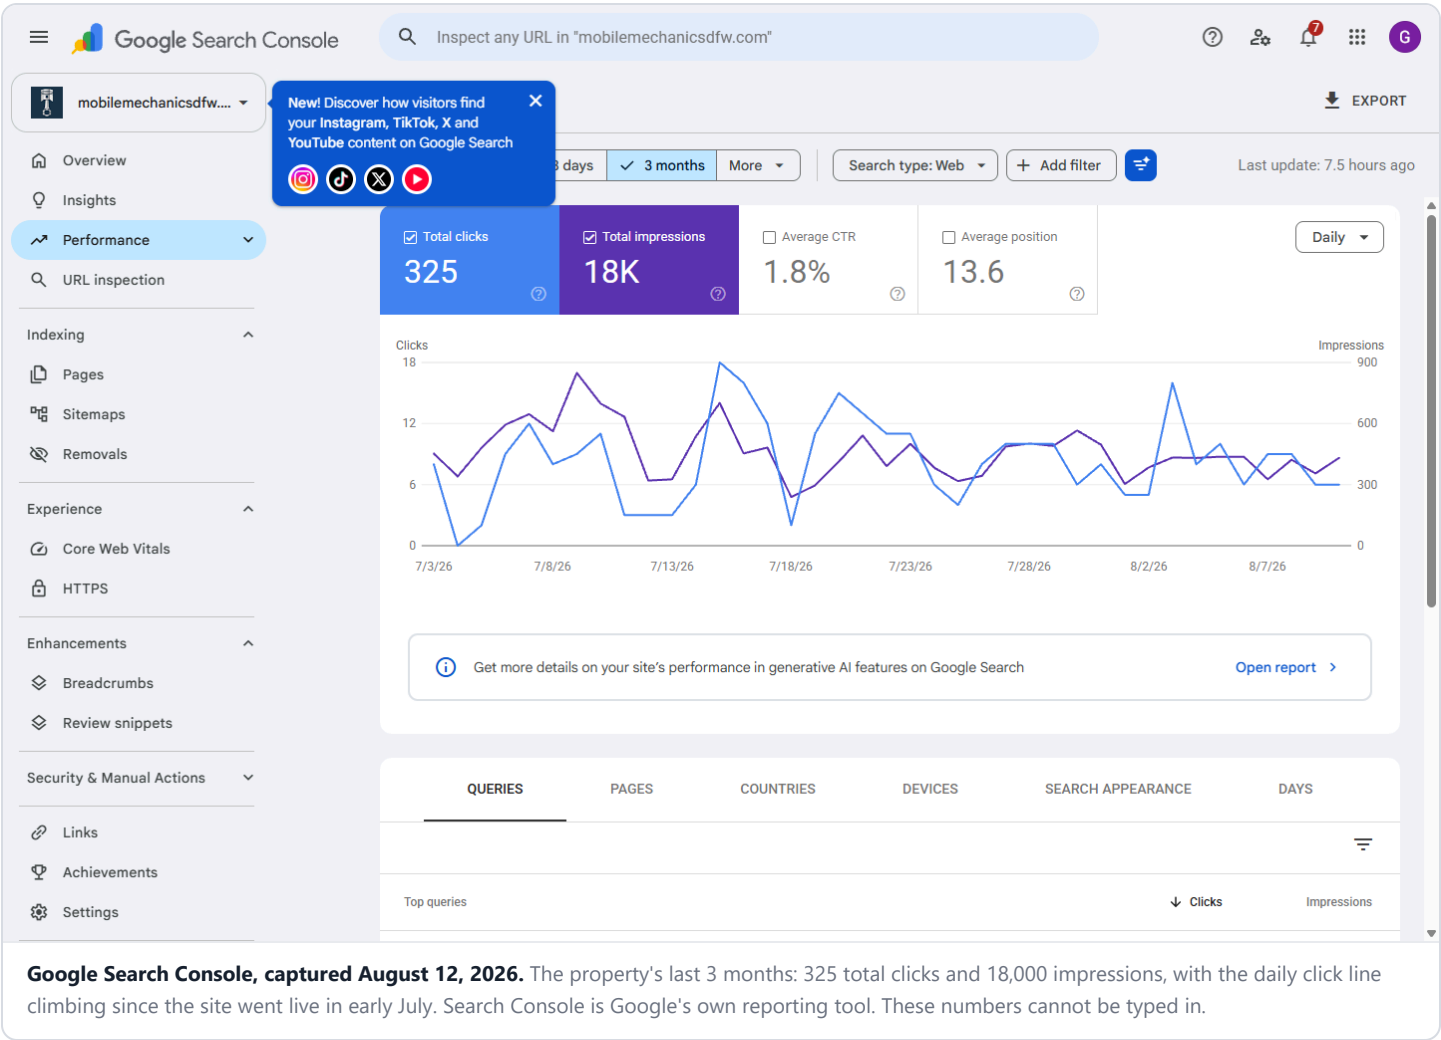

- Map visibility:** we measure Google Maps rankings from 9 separate points spread across the service area, because customers in different neighborhoods see different results. The business currently appears at 7 of the 9 measured points for "mobile mechanic fort worth."
- Market position:** 261 Google reviews against a typical competitor's 80, in a field of 10 businesses competing for the same searches.
- Everything measured:** analytics on the site record every call tap, text tap, and quote form, so the client sees exactly what the search traffic turns into. Organic search is the site's top traffic source, and the site is already logging visits referred by AI assistants like ChatGPT, which is where a growing share of local searches now starts.

WHY IT WORKED

When someone in Fort Worth searches for a specific repair, a page built for exactly that repair in exactly that city answers them. Multiply that by 350 combinations, keep the map listing active, and publish steadily, and Google has every reason to send the searcher here instead of to a competitor with a five-page site.

THE PROOF, STRAIGHT FROM GOOGLE

Anyone can type numbers into a document. These are unedited screenshots of Google's own dashboards for this client, from the accounts we manage.

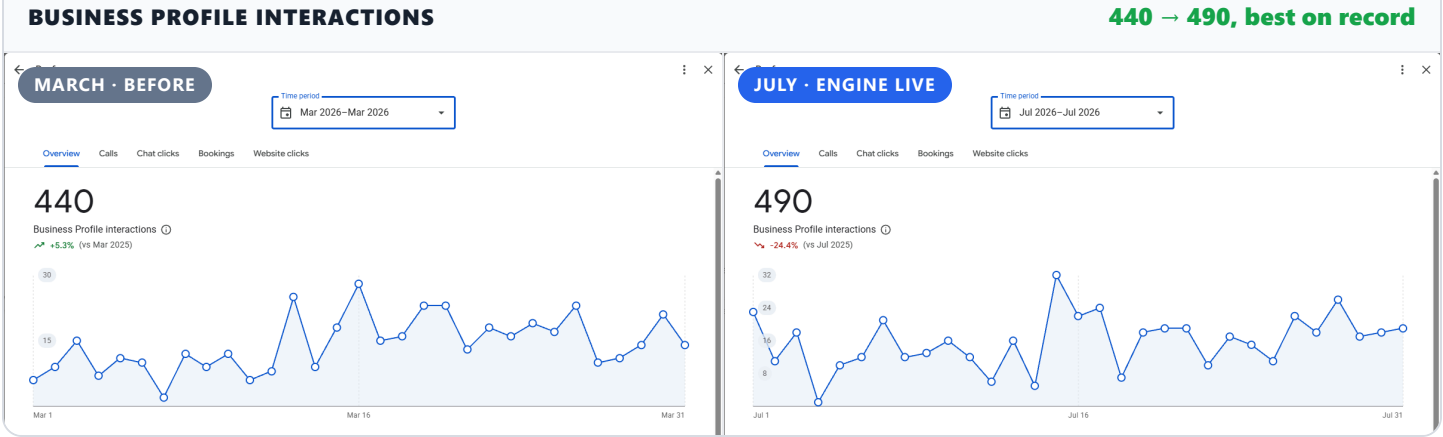

GOOGLE BUSINESS PROFILE: FIVE MONTHS ON RECORD, BEST MONTH LAST

We captured the profile's dashboard all the way back to March, so the before picture is on file. March through May is the business on its own: bouncing between 349 and 440 monthly customer actions and sliding against its own 2025 numbers. We took over June 3 and shipped the new site at the start of July. July is the best month on record for every single metric on the profile.

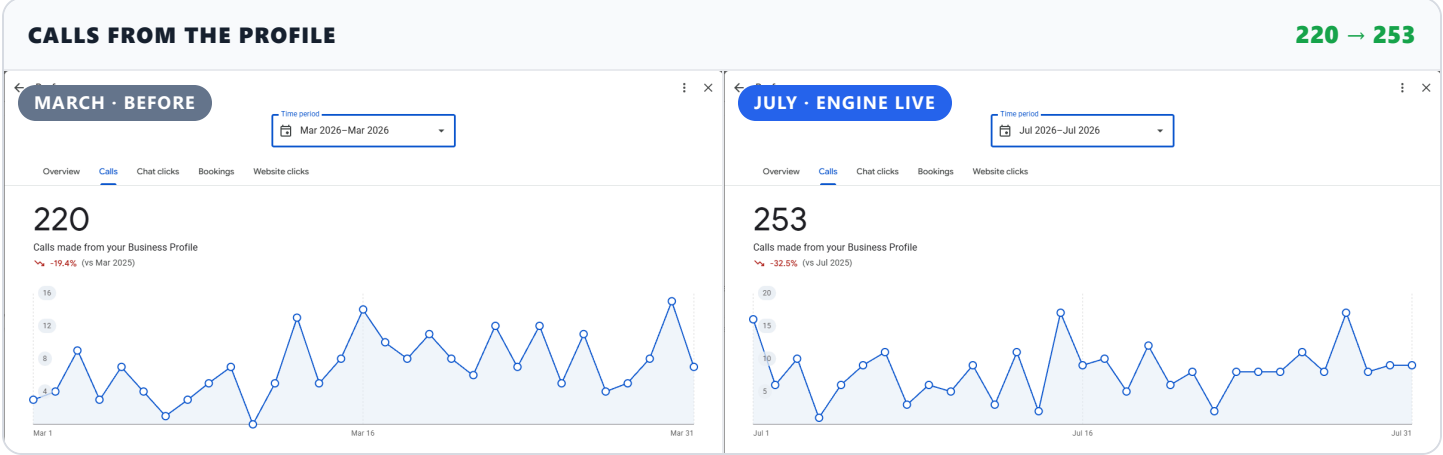

PROFILE METRIC	MAR	APR	MAY	JUN	JUL	JUL VS BEFORE AVG
Business Profile interactions	440	349	400	421	490	+24%
Calls from the profile	220	160	201	225	253	+31%
Website clicks from the profile	180	168	174	167	192	+10%
Messages from the profile	40	21	25	29	45	+57%

"Before avg" is the March-to-May average, the three full months before we were involved. July beats not just the average but every individual month on record, on every row.

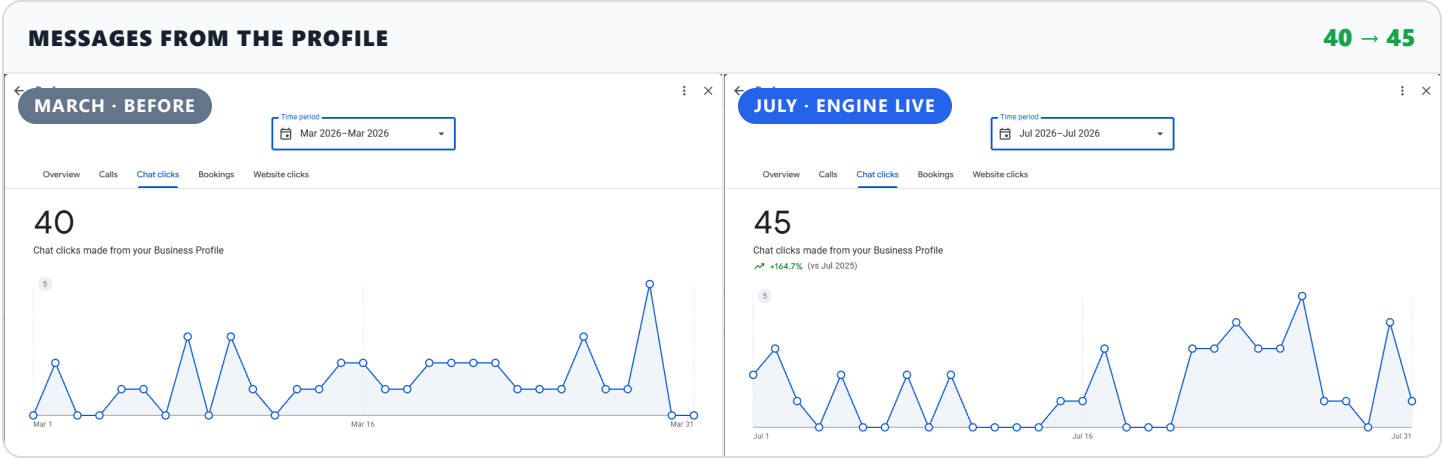

440 → 490, best on record

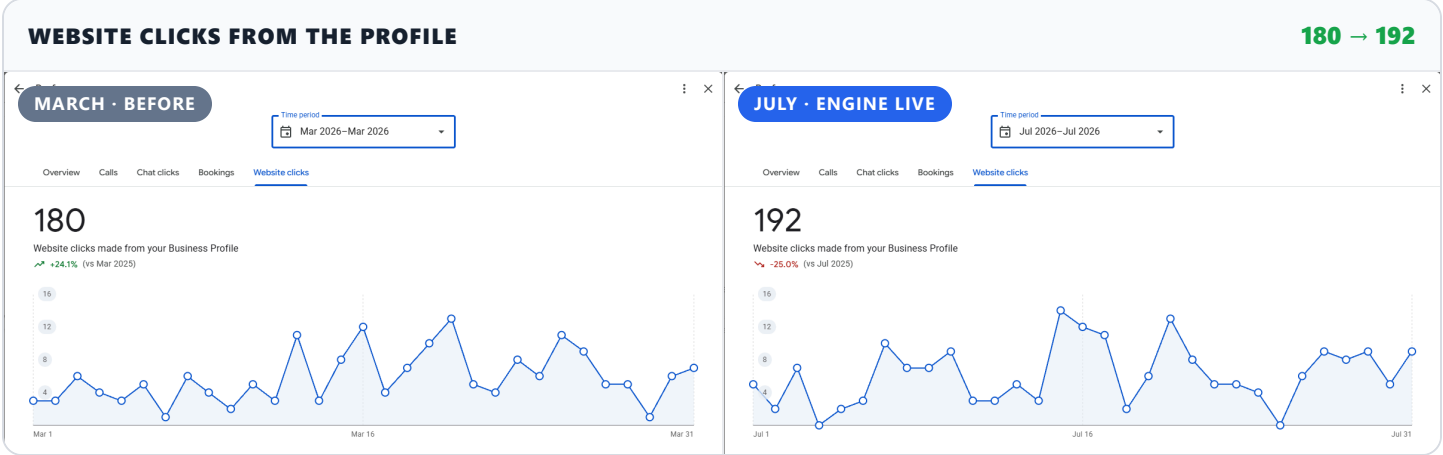

220 → 253

40 → 45

180 → 192

The red vs-2025 line inside the panels is Google comparing the profile to itself a year earlier, before we were involved. That slide is what we walked into; July breaking every month on record is what happened next.

That clicking sound when you turn the key is usually giving out. Once it fails completely, the car won't start.
