COMPANY PROFILE

Red Aces Construction and Demolition LLC is Service Disabled Veteran Owned Small Business (SDVOSB) specializing in high-efficiency onsite soil recycling, rock crushing and infrastructure support. We provide “Circular Economy” solutions for federal and state construction projects, converting onsite ledge and “bony” glacial till into usable structural aggregate, significantly reducing hauling costs and carbon footprints.

Red Aces Construction’s commitment to **“building a lasting legacy”** is what sets us apart. We ensure on-time project completion and foster a solutions-oriented culture that will **“think outside the box”** to tackle those challenging designs and/or problems that may arise during any construction project.

SBA Certifications and Other Licenses

Service Disabled Veteran Owned Small Business
SDO Certified VBE (Massachusetts)

Construction Supervisor CS-114645
HE-2A-Excavators HE-173711

Core Competencies

Mobile Rock Crushing High-volume onsite processing of native ledge and stone into AASHTO spec aggregates.

Precision Soil Screening Mechanical separation of glacial till and “urban fill” for structural backfill and loam production.

Logistical Management End to end management of material flow to eliminate offsite tipping fees.
